

World Wind Energy Conference 2021

WWEC2021 will enter new spheres: The main international wind power conference goes virtual!

www.wwec2021.org

The 19th World Wind Energy Conference WWEC2021 has been scheduled to take place from 24-26 November 2021, with the theme “Powering the World with Wind and Sun”.

Previous WWECs took place on all continents and attracted thousands of wind power experts from around the world. On an average, more than 100 speeches were presented during the WWECs, discussing all aspects of wind energy.

Considering the global situation and travel restrictions, the hosts of WWEC2021, WWEA and TERI, decided to enter new spheres with WWEC2021 and hold the event as a virtual platform.

The virtual format will allow new forms of participation and will allow even more participants from around the globe to participate in and contribute to the major wind energy conference of the year 2021.

The WWEC2021 Committees will prepare a unique programme gathering leading wind, solar and other renewable energy experts. As usual, WWEC2021 will comprise of plenary as well as parallel sessions centred around the main conference theme “Powering the World with Wind and Sun”, in other words focusing on the global shift towards a renewable future.

Together with our partners, the International Solar Alliance, Indian Windpower Association and International Solar Energy Society, we will prepare a first class conference programme.

Due to the new format, the WWEC2021 organisers are still accepting abstracts to be included in the WWEC2021 conference programme.

Companies will have the opportunity to showcase their products and services in a virtual exhibition which will be opened during the WWEC2021 and stay online for one year.

We look forward to welcoming you to the virtual WWEC2021!
